

# HPC SERIES

## Pile crackers

HPC pile crackers can be used for demolition of square and round foundation piles.

These hydraulic post breakers are ideal for removing foundation piles. Hydraram developed the pile crackers as an alternative for dismantling with hand hammers, which is very time-consuming.

When piles remain 1 to 2 meters above ground level and need to be removed, it is ideal to keep the rebar intact. Pulverizers usually cannot handle the diameter of piles and damage the rebar in the process, so a pile cracker tool is necessary for safe and easy pile removal and rebar preservation.

Low vibration & noise pollution

Interchangeable teeth

PILE CRACKERS			HPC-350	HPC-500	HPC-600	HPC-700	HPC-900
